

American Pools & Spas Showcases Pool Pro Office

Pool Pro Office implemented at Central Florida Premier Pool Company

Orlando, FL – April 30, 2008 – After several attempts to develop a solution, internally and externally, American Pools & Spas, Inc. has selected Pool Pro Office for their pool construction management solution.

"This is the program that we've been looking for years. We've looked at many different programs, and even tried to write one of our own. We needed something that could be used by the entire office staff and the personnel in the field. Pool Pro Office had the answer. The technical support that we've received is phenomenal. Every question or suggestion has been received with open arms and quickly addressed by Pool Pro," said Janet Corson, Director of Construction for American Pools & Spas.

In the recent Pool and Spa News, April 30, 2008, Ben Evans, CEO of American Pools & Spas stated, "Anybody can make a system that works from a sales lead through to the construction process, but the problem has been going from the construction process through scheduling. What 'Pool Pro Office' has done is recreate the physical job board on a computer-based program. When a scheduler looks at it, he can see the whole picture and not miss anything."

American Pools & Spas has deployed Pool Pro Office in January 2008 for all staff, receptionist to service/warranty department. Site superintendents have laptops with mobile broadband cards, which allow for direct connection to all projects, therefore, reducing phone calls and trips to the office to obtain construction drawings and to complete checklists.

American Pools & Spas has made their facility available to showcase their technology and the implementation of Pool Pro Office. Qualified pool construction companies interested in a tour of a world-class facility and viewing Pool Pro Office in an office environment contact Mark Richter, VP Sales, Pool Pro Office, Inc. Pool Pro Office, Inc. selected American Pool & Spas, Inc. to showcase Pool Pro Office, because of their state-of-the-art computer technology and network infrastructure.

Pool Pro Office is a cross platform (runs on Mac OS X and Windows XP) networked solution.
